PROFILE

Software Engineering student and IT Technician with professional IT experience and hands-on web development projects. Builds responsive websites and business systems using JavaScript, Python and relational databases. Interested in practical solutions, clear communication and straightforward user experiences.

PROJECTS

Dsystem ERP | Python, Streamlit, MySQL

Business management system covering service orders, inventory, purchasing, billing, finance, contracts and a customer portal. Project work includes database migrations, testing and deployment routines.

Hardware Store Web System | Next.js, JavaScript, MySQL

Web application for managing products, customers, suppliers and sales. Relational database implementation includes views, triggers and stored procedures.

EXPERIENCE

IT Intern - Dsystem Tecnologia | July 2026 - Present

Support IT operations through technical assistance, maintenance, system configuration and troubleshooting. Help colleagues resolve day-to-day technology issues.

Intern - RM Informática | Two-month placement

Assisted with computer support, software setup, preventive maintenance, equipment organization and customer technical assistance.

EDUCATION

Bachelor's in Software Engineering - UNIBH, Belo Horizonte

2026 - 2029 (expected)

Technical Diploma in Information Technology - IFMG, São João Evangelista

Completed in 2025

TECHNICAL SKILLS

JavaScript, Next.js, HTML, CSS, Python, Java, Node.js, Streamlit, SQL, MySQL, Git, GitHub and REST APIs.
